

# Notes About Science Double & Triple Award

## In Year 9 & 10

All students will start on the Science Double Award course in Year 9. (The topics covered are common to both the Double and Triple Award.)

## In Year 11

Those students who show a good work ethic and high academic achievement will go on to study more challenging topics as they continue into Year 11 and will work towards Separate Sciences examination entries OR the Triple Science Award examination.

Students who would find the Triple/Separate Science Examination too difficult will spend Year 11 consolidating and improving their understanding of the Double Award work they have completed so far and will be entered for the Double Science examination.
